**Adkins Rock Quarry Information
Huff Creek**

1909
SUMMIT COUNTY COURT HOUSE
May 11, 1998

Community Development

John Adkins Jr.
P. O. Box 386
Coalville, Utah 84017

Subject: Adkins Rock Products, Huff Creek

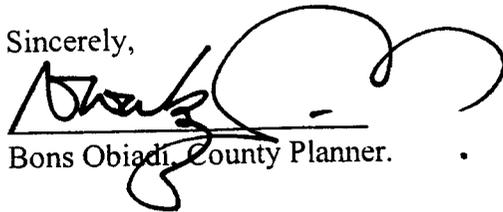

Dear Mr. Adkins,

While we are still processing your application for a Temporary Use Permit, please be advised that your proposed quarry operation has been scheduled before the Eastern Summit County Planning Commission for June 3, 1998. To complete the review of your application, this office would require the following information:

1. The applicant shall demonstrate that he/she possesses the requisite skills and experience needed to ensure that the particular activity will be conducted in a safe and orderly manner.
2. This office will need to know the number of trucks and other movable equipment that will be used in this operation, reclamation plan and hours of operation.
3. A sketch plan showing the location of the proposed quarry in relation to Chalk Creek and also, showing all the neighboring buildings, if any.
4. A memo from the County Engineer, indication that it is appropriate to access the proposed site through the county road and also, a memo from the County Engineer or the Health Department, indication that the proposed project would not impact the public health, safety, and welfare of the area residents.
5. How do you plan to carry out this operation? Would it involve 'Rock Blasting,' if yes, would the services of the County Fire Department be required? **Please supply this office with a complete operation plan.**

The above information would be required to complete your application. Please give me a call should you have any further questions.

Sincerely,

Bons Obiadi, County Planner.

Snowmobile File

Basic Information for
Adkins' Rock Products, Huff Creek

Location	Approximately 2 miles North of Chalk Creek Road in Huff Creek
Stone Recovery Area	Less than 5 acres
Purpose	To supply public with building sandstone
Materials Used	Existing Frontier Sandstone from private land
Size of privately owned property	640 Acres— site will be in the center of this acreage - section 13
Work crew	2-3 man operation (regular work day) 8 a.m - 6 p.m. 1-2 truckloads a day
Activity	Drilling, light explosives, hauling No working on Sat. or Sun.
Explosives	Light duty charges (not dynamite) a few times a day
Nearest Resident	(over) 3/4 of a mile
Wildlife	Not a major wildlife habitat— All work areas will be revegetated

Hansen Quality Building Stone will operate the rock quarry operation at Huff Creek.

At the stone area an equipment parking and stone staging area will be within the 1 acre for loading.

As the stone blocks are cut they will be loaded at the site for shipment on a tractor-trailer rig.
(approx. size of stone 4x4x4)

The site and staging area will be restored when the project is completed by reseeded the disturbed areas to grasses in accordance with the State of Utah, Division of Oil, Gas, and Mining regulations. All reclamation is subject to the inspection and approval of the Division of Oil, Gas, and Mining.

Maintenance and Servicing Equipment:

Equipment: 1 977 cat loader, 1 ten-wheeled dump truck, 1 compressor, 1 pick-up truck, 1 semi, to haul stone (will not exceed 80000 pound gross state of Utah weight limit)

1. Fueling: Fuel will be transported in the pickup to the jobsite as needed. A fuel tank will not be stored on the job site location.
2. Lubricating: Drop pads will be used to prevent spillage of lubricants on the ground. Waste containers (leakproof barrels, and garbage cans) will be on site and will be removed as necessary.
3. Oil, Lubricant and etc.: No lubricant will be stored on site.
4. Environmental training: Each employee involved in maintenance and servicing equipment have been trained in methods and procedures to avoid any environmental damage.

Fire Safety:

1. Fire extinguishers and shovels will be available at the site. Most worker activity will take place in areas where there are no flammable materials.
2. Smoking will be prohibited on the jobsite.
3. Considering the fact that rock does not burn, nothing beyond the services of the North Summit Fire District will be required.

Sanitary Toilets:

1. Self-contained, portable toilets will be provided near the work area and will be serviced on a regular basis.
2. Employees will be instructed to use these facilities.

Water Use:

1. The drilling procedures do not require water use.
2. Drinking water will be brought onto the site in coolers for employee use.

Explosives:

Types: The plan is to use a detonating electric cord and explosive caps. There is no blasting in the operation of quarrying building stone. High explosives damage the stone. We use black powder, a slow combustion powder.

1. The powder will not be stored at the site. A large supply of powder is not necessary on the site.

Continued from previous page.

Security:

1. Signs: Hansen Quality Stone Co. will have signs posted to prevent unauthorized personnel access to the quarry area to avoid vandalism and accidents.

Erosion Control:

1. There will be no erosion. It is solid rock.
Derrick Radke suggested bales of straw to divert water through the existing culvert and otherwise to prevent erosion near the site. This should not be a large concern since water buildup would occur only following a heavy rain.

Schedule will be as soon as permitting process is completed with Summit County and the State of Utah.

Qualifications of Weston Hansen for quarrying, cutting, and supplying stone. He furnished the stone for the following projects:

1. Started quarrying and cutting stone at the age of 15 years old. His grandfather and father were stone cutters.
2. Salt Lake Temple--restoration in 1995
Annex building of Salt Lake Temple in 1962
3. Salt Lake City--City and County Building--full restoration 1990
4. Restoration work at the College of Laramie
5. Pioneer Social Hall by Hogle Zoo
6. Lamb's Cafe on Main Street--full restoration
7. G T E Building in Dallas, Texas
8. University of Colorado athletic center--at present time.

Wes Hansen/Hansen Stone Quarries

**EXCELLENCE IN CRAFTSMANSHIP FOR WORK ON
SALT LAKE CITY AND COUNTY BUILDING MASONRY**

Wes Hansen's work on the City-County Building Restoration spans a period of more than 17 years, through at least three contracts. The range of masonry work has included structural corrections, reconstructive cosmetics, duplication of ornament, and imaginative interpretive work that can only be recognized as "Art" in the truest sense.

Burtch Beall, architect on the project for many years, applied the following measure to the work of Wes Hansen and his shop:

"Wes has become a creative artist in areas where stone detail was so eroded that there was no way to reconstruct an image of its appearance, and sculptural interpretation was essential. The building was originally designed and constructed by artists who produced images interpretively. Wes was able to make composites that restore "Life" to the structure, by what amounts to an artists study of the styles of sculptural detail, whether realistic, fantastic or historical, that were still well enough preserved to enter the "vocabulary" the building."

Mr. Hansen's attitude toward this monumental project was composed and professional. Wes has consistently made himself open to suggestion and review, and thereby has integrated himself and his artisans into the flow of "Team Design" for the project, but you have only to walk around the building (carry your binoculars) to appreciate the art beyond craft that Wes has given to the decades to come.

This project when completed and reclaimed will be an upgraded area of vegetation for cattle grazing and wildlife.

SHARPA & WILKINS

May 18, 1998

John and Shanna Adkins
PO Box 386
Coalville, UT 84017

Dear John and Shanna:

As per your request on May 16th, 1998, I would like to respond to the questions you raised concerning the Huff Creek Road:

- 1) *When will the Huff Creek Road be upgraded?*

The Public Works Department has plans to complete routine maintenance work on the Huff Creek Road before the fall of 1998.

- 2) *Define you plans for upgrading the Huff Creek Road.*

The Public Works Department had plans to place no cost Roto-Mill material from UDOT on the gravel portion of Huff Creek Road and then resurface the existing asphalt pavement with approximately two inches of hot asphalt.

Since the original plan, the contractor is requiring Summit County to purchase the Roto-Mill material at \$2.50 per ton. The gravel portion on Huff Creek Will require approximately 5,437 tons of Roto-Mill material at a cost of \$13,594. Because of this unexpected cost, this will reduce the amount of hot asphalt resurfacing that will be done on the existing asphalt pavement.

- 3) *By whom and when were these plans approved?*

LaMar Richins submitted a request to the Summit County Commission in December 1997 for \$12,000 to be spent on the Huff Creek Road in 1998.

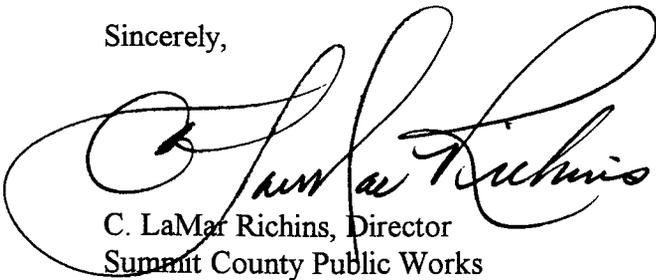

May 18, 1998
Page two

- 4) *Is the Huff Creek Road adequate for hauling building stone out of the privately owned land of John Adkins, Jr. and Shanna J. Adkins?*

I can not comment on this question until I know the number and weights of the proposed trucks to be used to transport the materials on the Huff Creek Road.

If you have any further questions or concerns, please feel free to contact me at any time.

Sincerely,

A handwritten signature in black ink, appearing to read "C. Lamar Richins". The signature is written in a cursive style with large, flowing loops.

John and Shanna Adkins
PO Box 386
Coalville, UT 84017

Dear John and Shanna:

As per your request on today, I would like to respond to the question you raised concerning the Huff Creek Road:

- 1) *Would the Summit County Road Department object to me hauling one to two legal weight loads per day of rock from my property down Huff Creek Road?*

I checked the Huff Creek Road after our discussion on May 18th and could see no problem with one or two loads per day with the following exceptions. I would suggest the following:

- Try to schedule the time your truck would be on the Huff Creek Road so it would not interfere with the daily school bus schedule. The school bus schedule is a very exact time and I feel this could be coordinated very easily.
- During stormy weather, I would suggest you not transport material from your project.

If you have any further questions or concerns, please feel free to contact me at any time.

Sincerely,

A large, stylized handwritten signature in black ink, appearing to read "C. LaMar Richins". The signature is written over a white background and is positioned above the printed name and title.

Subject: Adkins' Rock Products, Huff Creek

Dear Mr. Radke,

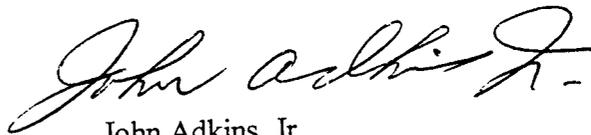

The following is a list of equipment you requested to be used in the Huff Creek stone quarrying operation.

- 1 977 cat (loader)
- 1 10 wheeled dump truck
- 1 compressor
- 1 pickup truck
- 1 semi to haul stone--will not exceed 80,000 lbs. gross (state limit)

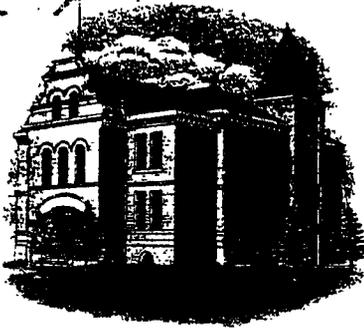

Operation hours: 8 a.m. to 6 p.m. No working on Saturday or Sunday.
1-2 truck loads a day.

We will be happy to accompany you this week to the quarry site to observe the proposed area.

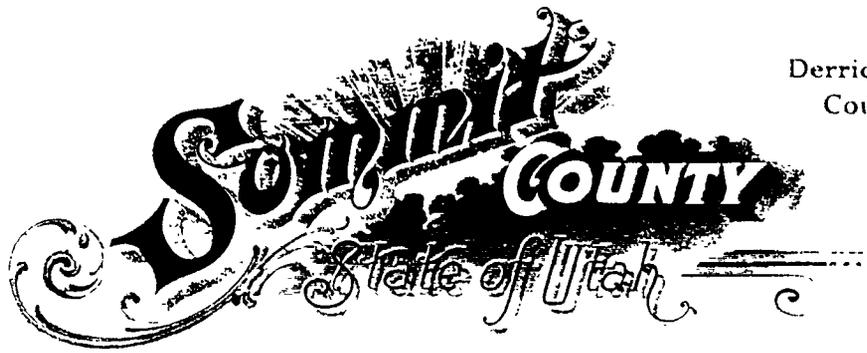

Sincerely,

John Adkins, Jr.

MEMORANDUM

DATE: May 21, 1998
TO: Bons Obiadi, County Planner
FROM: Derrick A. Radke, County Engineer *DA*
RE: Adkins' Rock Quarry

At the request of Mr. John Adkins, Jr., I have visited the site of the proposed rock quarry. The project will be accessed on Huff Creek Road which is a county road up to the "tee" intersection (truck turn around). The road is narrow and semi-improved and in my opinion will not hold up to a lot of truck traffic, however the proposed 1 to 2 trucks per day should not have too much of an impact.

The following would be my recommend conditions for the project:

- 1) Limit loads to 1-2 trucks (80,000 GVW) per day or equivalent smaller loads.
- 2) No truck traffic when road becomes saturated.
- 3) No truck traffic from one half hour prior to the school bus pick up of children in the morning and again from one half hour after the school bus drops off the children in the afternoon.
- 4) Any road grading required beyond the County's normal maintenance (past) would be the responsibility of the applicant and must be completed upon notification of the Public Works Department.

- 5) Submit an erosion control plan acceptable to the County and post a bond for it's implementation and maintenance.

If I can be of further assistance. Please let me know.

PUBLIC HEARING NOTICE

**TEMPORAL USE PERMIT
FOR ADKINS ROCK PRODUCTS, HUFF CREEK.**

Public notice is hereby given that the Eastern Summit County Planning Commission will hold a public hearing to discuss a Temporal Use Permit for Adkins Rock Products at Huff Creek, about two miles off Chalk Creek. The public hearing is scheduled for June 3, 1998, beginning at 7:00 p.m. in the Kamas City Hall, 170 N. Main Street, Kamas, Utah.

The applicant, John Adkins Jr. is proposing a Quarry on his property at Huff Creek, about two miles from Chulk Creek. The purpose of the public hearing is to discuss and receive comment on the proposal.

For further information, please contact Bons Obiadi at the Summit County Department of Community Development, 627 South Main Street, Coalville, Utah 84017 or call (801) 336-1240.
